

Natural diatomaceous earth aka "DE" is excellent for internal and external natural parasite control in horses and foals. This food grade diatomaceous earth comes from fresh water lake beds, thousands of years old and is not chemically treated. All natural diatomaceous earth references herein apply only to "food grade diatomaceous earth".

Diatomaceous earth's mineral content and anti-parasite and worm properties increases proper feed utilization

Diatomaceous earth helps protect horses and foals by providing

excellent fly control. Feeding diatomaceous earth daily lowers manure odor thereby attracting fewer flies and keeps fly larvae from developing in manure, noticeably reducing the fly population. Food grade DE is reported to kill 75% of flies, fleas

and mites that come in contact with it within 72 hours. Diatomaceous earth is a drying agent and thus reduces odor and moisture in horse barns and stalls, again helping to reduce fly and other parasite populations.

Food grade diatomaceous earth mixed with grains at a ratio of 2% keeps out pests better than malathion. DE helps eliminate ants, aphids, flea beetles, fleas, earwigs, sow bugs, mites, bed bugs, etc.

Food grade diatomaceous earth can be applied as a foliar spray, sprayed in buildings, just lightly sprinkled in pest infested areas or compost/manure piles.

Diatomaceous earth is great for internal worming and parasite removal for everyone: humans, horses, livestock, and pets. Diatomaceous earth helps detox heavy metals. Add food grade diatomaceous earth to horse waterers, it helps prevent algae from growing so quickly in the hot summer

months.

We feed food grade diatomaceous earth free choice to our horses and animal guardians (livestock and pets) and ourselves. We put diatomaceous earth in our livestock organic grain-herb-seed mixes that are fed daily and keep it out free choice in the barns and pastures in PVC mineral feeders. DE is fed daily in our canine

and feline food. We recommend feeding diatomaceous earth free choice and added to daily feed for maximum health benefits and effectiveness.

Since feeding and using food grade diatomaceous earth on our property daily, we have never needed to use chemical wormers and have been able to eliminate fly populations completely.

***RESULTS ON FEEDING CODEX FOOD GRADE DIATOMACEOUS EARTH TO WALKING HORSE, L. Thomas, Trainer, L. Frank Roper Stables, Winter Garden, FL:** With horses fed approximately 5 oz. of DE mixed in the feed twice daily, the following results were observed: Stopped scours even on horses that had not responded to any other medications. Noticeable fly reduction. Horses showed an increase in appetites. Weight gain due to better feed conversion. Reduction in manure odor. Elimination of any internal parasites. Healthier appearance.

Start foals on food grade diatomaceous earth as soon as they are eating to prevent worms and protozoan. This gives them a nice, healthy start and will help keep them strong and healthy.

DAILY RECOMMENDED FEEDING RATES:

Kittens - 1/2 teaspoon

Cats - 1 teaspoon

Puppies - 1/2 to 1 tsp.

Dogs under 35 lbs. - 1 teaspoon

Dogs over 35 lbs. - 1 tablespoon

Dogs over 100 lbs. - 2 tablespoons

Cattle, Dairy Cows, & Hogs - 2% of dry feed ration

Chickens - 5% in feed

Goats & Sheep - 2% in grain

Horses - 1/2 to 1 cup in daily ration

Humans - 1 heaping tablespoon daily

We recommend feeding food grade diatomaceous earth daily to your horses and foals for optimum natural health benefits.

More Food Grade Diatomaceous Earth Information

FOOD GRADE DIATOMACEOUS EARTH BENEFITS

SUMMARY:

- Natural wormer – eliminates many parasites without chemicals
- Safe, non-toxic, parasites don't build immunity as they do with traditional wormers
- 15 trace minerals – great for animals, humans, plants, and soil
- No feed withdrawal for milk or feed animals
- Decreased mastitis
- Reduced scours
- Decreased mortality
- Better feed conversion
- Helps detox heavy metals, e-coli, bacteria, viruses, etc.
- Promotes shinier coats
- Digestive aid
- Colon cleanser
- Better production
- Better overall health
- Eliminates pests in stored grains
- Reduces flies, fleas, ticks, etc.
- Reduces manure odor
- Drying agent
- Reduces moisture and pests in barns, coops, kennel, litter boxes, compost piles, and other moist areas
- Antifungal properties – good for garden fungal growth
- Reduces overall animal stress
- Cost effective
- DE health benefits mean reduction in vet bills and disease
